

Abhaya Simkhada

Civil Engineering Technology Graduate | GIS | Transport Planning | Stormwater | Local Government Infrastructure

Toowoomba, Queensland | LinkedIn: [linkedin.com/in/abhaya-simkhada-57171b305](https://www.linkedin.com/in/abhaya-simkhada-57171b305) | Portfolio: abhayasimkhada.com

Professional Summary

Civil Engineering Technology graduate with project evidence across GIS-based infrastructure planning, transport and walking network support, stormwater and hydrology analysis, geotechnical study and council-style technical reporting. Experienced in organising infrastructure asset data, checking footpath and bus stop records, and communicating project evidence clearly.

Key Project Evidence

- **Footpath Network Development Plan:** Reviewed, digitised or scored 3,500+ footpath records using spatial criteria and spreadsheet workflows.
- **Future Walking Network Plan 2024:** Supported active transport evidence by connecting walking routes with schools, shops, bus stops and pedestrian access needs.
- **Bus Stop Asset Data:** Maintained and checked 100+ bus stop asset records for transport planning data quality.
- **USQ Campus Catchment Flood Management:** Applied stormwater and hydrology concepts including rainfall inputs, Rational Method thinking, RORB workflow and hydrograph interpretation.
- **Geology and Geomechanics Study:** Prepared field and lab evidence involving soil behaviour, compaction, permeability, Atterberg limits and site assessment concepts.

Technical Skills

GIS / Spatial	Intramaps, Queensland Globe, map layers, asset records, spatial checking
Transport	Footpath networks, walking route analysis, bus stops, LATM exposure, traffic counter inspection
Stormwater	ARR Data Hub, RORB, Rational Method, rainfall intensity, peak flow, hydrographs
Geotech	Soil behaviour, compaction, permeability, Atterberg limits, field/lab interpretation
Reporting	Council-style reports, document control, WHS awareness, standards awareness, Excel, Word, PowerPoint

Experience and Education

- **Toowoomba Regional Council transport/infrastructure context:** Footpath, walking network and bus stop data support using GIS and spreadsheet workflows.
- **Civil Engineering Technology study:** Civil infrastructure, hydrology, geotechnical, transport, technical reporting and project communication tasks.
- **Workplace discipline:** WHS awareness, clear documentation, team communication and professional presentation.
